

ENERGY BUILDER®

Key Driving Factors

- Early identification of poor quality data can prevent negative consequences e.g. financial or reputational
- Delivery of timely and accurate data
- Reduce human error
- Controlled and auditable process
- Measurable KPI's
- Improved decision making

Functional Coverage

- Complete Production Management from reservoir to custody transfer
- Forecasting, cargo scheduling and shipping documents
- Deferment management
- Automatic data capture of PI
- Daily Production and Operations reports
- Work Flows & Dashboards

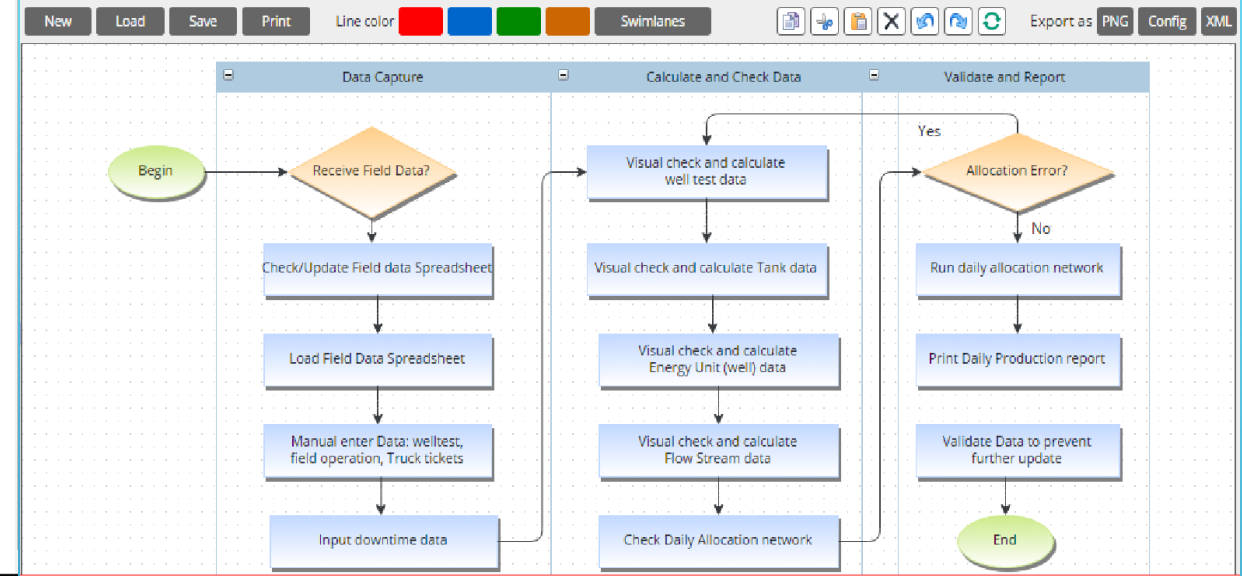

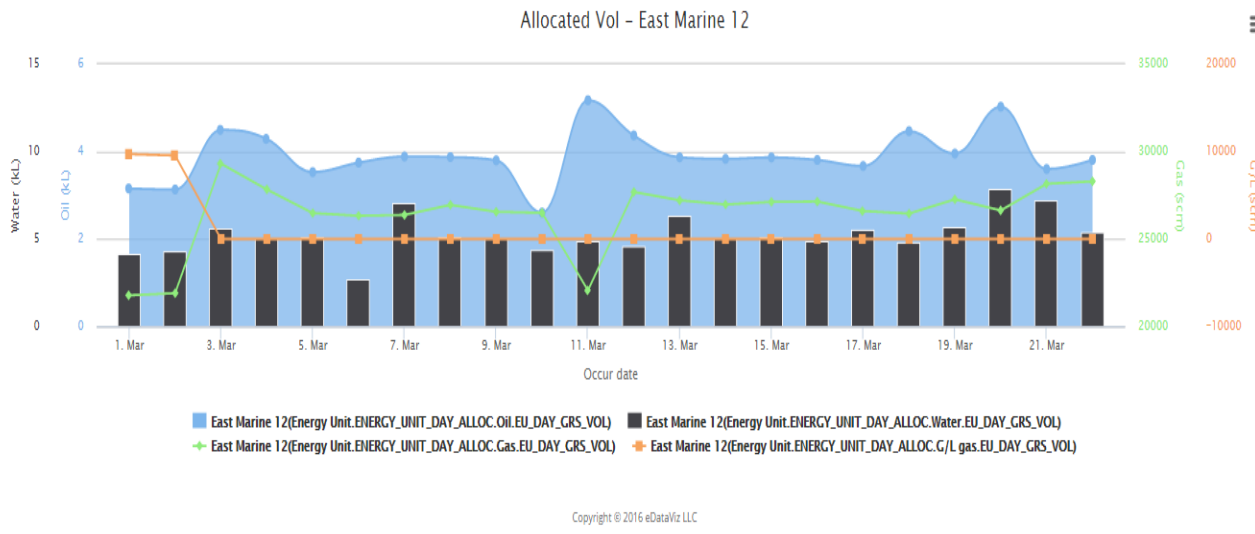

Driving Down Costs

- No servers required – SaaS Cloud Solution
- No upfront license cost
- Rapid implementation (~12 weeks)
- Low cost implementation
- At least a 50% cost reduction from market leading vendor
- Low cost ongoing support; No Maintenance Fees

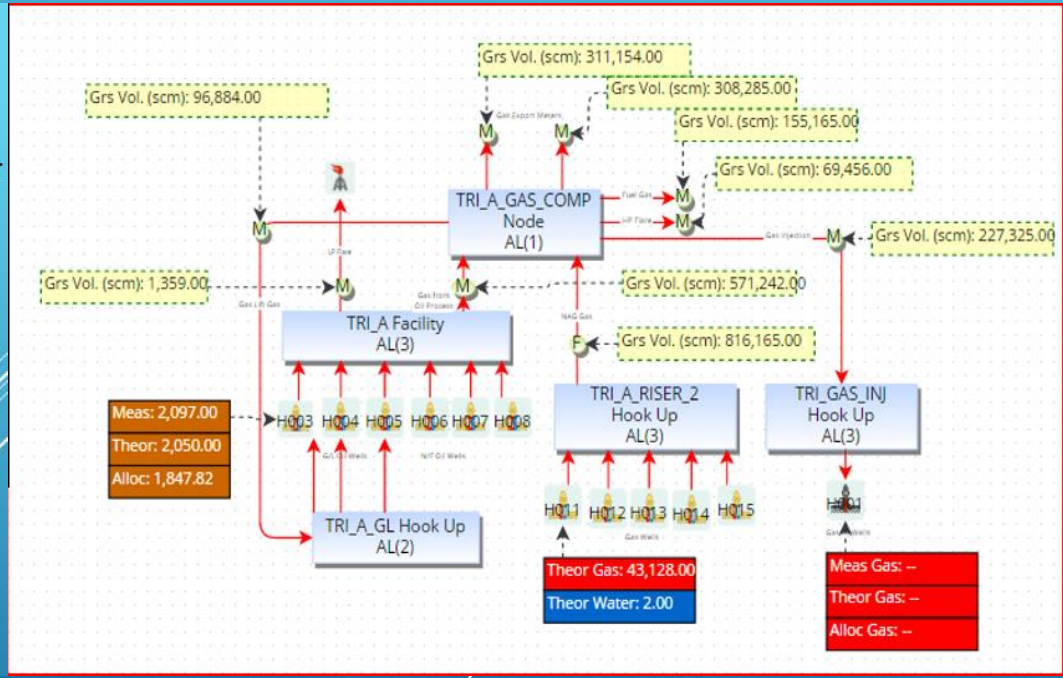

Suneses-Energy provides Hydrocarbon Accounting Solution with Energy Builder
